Project Design Phase-II
Data Flow Diagram & User Stories

Date	20 October 2026
Team ID	En25cs3010862
Project Name	Health360: Comprehensive Healthcare Risk & Disease Analytics
Maximum Marks	4 Marks

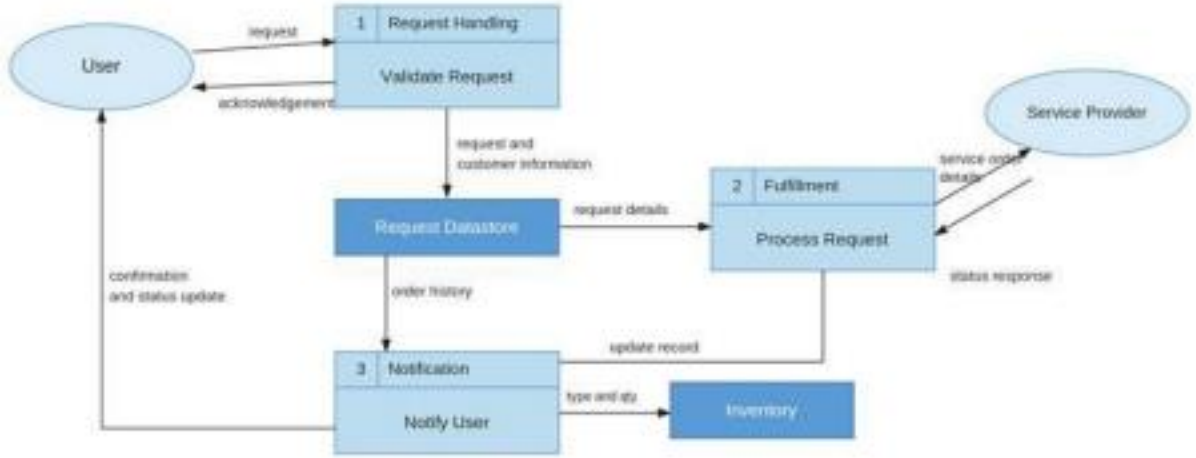

Data Flow Diagrams:

A Data Flow Diagram (DFD) is a traditional visual representation of the information flows within a system. A neat and clear DFD can depict the right amount of the system requirement graphically. It shows how data enters and leaves the system, what changes the information, and where data is stored.

DFD Symbol Legend

Symbol	Name	Description
Oval / Rounded shape	**External Entity**	A person, organization, or system outside the project that sends or receives data (e.g., Customer, Payment Gateway).
Rectangle with numbered header	**Process**	An activity that transforms incoming data into outgoing data (e.g., Validate Request, Process Order).

Rectangle (solid fill, no number)	**Data Store**	A place where data is held for later use (e.g., Customer Database, Inventory).
Labeled arrow	**Data Flow**	The movement of data between entities, processes, and data stores, labeled with what data is being passed.

User Stories

Use the below template to list all the user stories for the product.

User Type	Functional Requirement (Epic)	User Story Number	User Story / Task	Acceptance criteria	Priority	Release
Customer (Mobile user)	Registration	USN-1	As a user, I can register for the application by entering my email, password, and confirming my password.	I can access my account / dashboard	High	Sprint-1
		USN-2	As a user, I will receive confirmation email once I have registered for the application	I can receive confirmation email & click confirm	High	Sprint-1
		USN-3	As a user, I can register for the application through Facebook	I can register & access the dashboard with Facebook Login	Low	Sprint-2
		USN-4	As a user, I can register for the application through Gmail	I can log in and access my dashboard via Google authentication successfully.	Medium	Sprint-1
	Login	USN-5	As a user, I can log into the application by entering email & password	I am successfully authenticated and redirected to my personal dashboard.	High	Sprint-1
	Dashboard	USN-6	As a patient, I can view my real-time health vitals (heart rate, SpO2) on my dashboard	Vitals are fetched and displayed accurately with clear status indicators.	High	Sprint-1
Customer (Web user)	Remote Monitoring	USN-7	As a web user, I can view my historical health trends and charts over custom time periods.	Graphs and data tables load correctly with accurate date-range filters.	Medium	Sprint-2
Customer Care Executive	Request Handling	USN-8	As a customer care executive, I can validate and manage incoming patient requests from the dashboard.	Requests are processed, updated, and logged into the datastore seamlessly.	High	Sprint-1

User Type	Functional Requirement (Epic)	User Story Number	User Story / Task	Acceptance criteria	Priority	Release
Administrator	User & System Management	USN-9	As an administrator, I can manage user roles, system inventories, and service provider listings.	Changes reflect instantly across system databases and access levels are enforced.	High	Sprint-2
